

Colocation Services

Different types of racks and professional remote hands. Carrier neutral facilities.

Tier 3 classified data centers

Heficed's data centers are all Tier 3 classified and hold compliance certificates that represent our focus on clients' privacy and security. Our best practices are proved by ISO, PCI, Soc 2 Type 2 certificates, BBB accreditation and others.

Security standards

To ensure maximum protection, data centers' best practices contain layered physical access control, building-in-building construction, 24/7/365 security guards, internal/ external video surveillance, segregated customer receiving and packaging recovery areas, and biometric access control.

Fire Alarm System

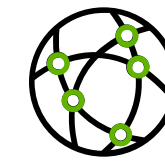

A smart fire detection system was developed to protect data centers in the event of a fire. A gaseous fire suppression system, fire alarms, and optical smoke detectors and their regular testing guarantee high reliability and safety.

Key Features and Benefits

ISO Certified Locations

We ensure that all of our globally located PoPs (Points of Presence) stringently follow the internationally affirmed standards of application expected of a high performing SaaS and network provider. These standards include ISO 27001 for information security management systems, ISO 9001 handling the requirements for a quality management system, ISAE 3402 Type II prescribing Service Organization Control reports, and ISO 14001 that monitors our environmental management systems.

High Availability of Tier 1 Networks

Heficed's extensive partnerships with numerous strategically selected top Tier 1 ISP providers ensure that our blended IP Transit service allows client organizations to profit from our globally located PoPs and extensive routing through settlement-free peering. The far-reaching combination enables us to deliver exceptional stable BGP connections throughout all the Internet Exchange Access points with whom we participate, with up to 100 Gbps of safe IP Blended traffic immediately available.

Professional Remote Hands

Colocating with Heficed provides you with options. Self-support or Remote Hands service, where you'll enjoy access to an experienced and highly-skilled team of support engineers. While you support your clients, we'll manage your infrastructure, from deployments to administrative assignments. Achieve IT resource efficiencies, improved expenditure control and, transform your data center operations through Heficed's Remote Hands service.

Shipping & Logistics Services

We have extensive experience in shipping to and from the most logistically challenging data center locations on the planet. A fully inclusive door-to-door solution is available for those companies colocating with us through our globally appointed shipping partners. Through these partnerships, we ensure compliance with local import laws and clearance through customs, packing, labeling, unpacking, and inventory of boxes and equipment.
